SOLUTIONS™

Drain Buster™

-  **Powerful** - A blend of microbes and enzymes that eliminates clogs and slow drains.
-  **Fast** - Consumes fats, oils and greases ("FOG") and food wastes.
-  **Effective** - It creates foam that treats the drain line up to 12 feet.
-  **Versatile** - Reduces fly infestations and eliminates odors.
-  **Safe** - Bio-based using only 100% all-natural ingredients.

What is Drain Buster™?

Clogged Drains - Drain Buster™ is a combination of all-natural microbes and enzymes that consumes fats, oils and greases, as well as food wastes. The all-natural microbes and enzymes consume clogs in drains and pipes and digest them into carbon dioxide and water. Drain Buster™ eliminates clogs and keeps pipes free-flowing and clog-free.

Slow Drains - Food waste and FOG adhere to pipes causing slow, sluggish drains. Slow, sluggish drains also create putrid odors and attract insects. Drain Buster™ creates a foam that acts as a delivery system that embeds the microbes and enzymes into the waste clinging to the side of the pipes. Drain Buster™ eliminates slow drains by consuming the waste that accumulates in drains and pipes. It does not contain any acids, caustics, detergents, surfactants or emulsifiers.

Why is Drain Buster™ Better Than Acids/Caustics?

Acid and caustic-based products only liquefy the FOG and food wastes, which creates additional clogs and blockages. Because of gravity, most drain cleaners cannot remove all of the waste in drains and pipes - Drain Buster™ can. Drain Buster™ engulfs the entire system and rids the drains and pipes of clogs and slow drains.

Where to Use?

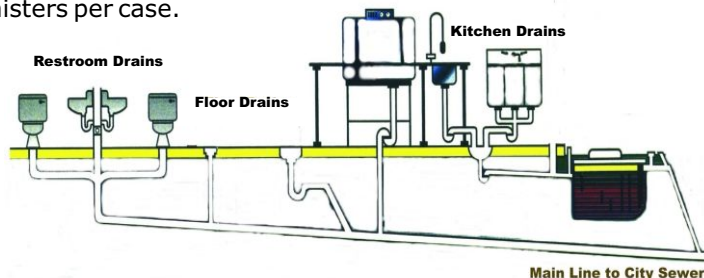

Used in kitchens, restaurants, restrooms, food processing, airports, apartment complexes, hotels, prisons, schools, athletic facilities - showers, sinks and floor drains.

How to Apply?

Apply 4 ounces of Drain Buster™ into clogged or slow drain. Apply 8 ounces of warm water to activate. Allow it to remain in the drain at least 4 hours before using again. Repeat weekly for continuous drain line maintenance.

How is It Packaged?

It is packaged in 4-ounce packets; 16-4 ounce packets per 1 gallon pail; 4-4 ounce packets in a canister, 18 canisters per case.

Product Advantages

Consumes FOG and food waste.

Eliminates clogs and slow drains.

Reduces odors and insects.

Acid-free and caustic-free.

Product Specifications

pH:	Neutral
Appearance:	Powder
Color:	Green
Flash Point:	None
Fragrance:	None
Shelf-Stability	One year
