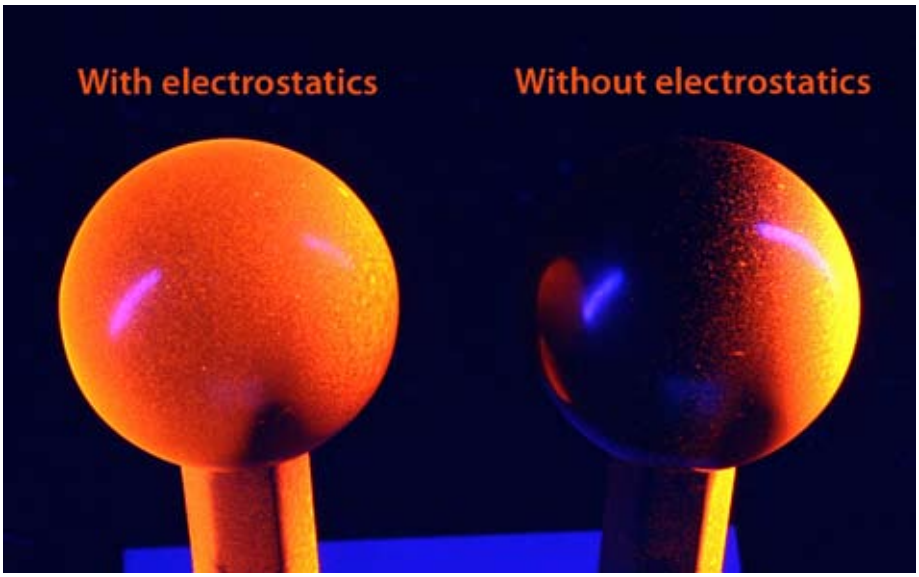
# XT-3

# THE MRSA X-TERMINATOR

One of the biggest public-health crises we face today is the rapid spread of antibiotic-resistant bacteria, the best-known being *Methicillin-resistant Staphylococcus aureus* (MRSA). How to fight it? **Stop it from spreading**. The best line of defense against MRSA is to disinfect regularly. Hospitals, doctor's offices, gymnasiums, schools, subways, and other public places ALL need to participate. It's smart risk management to find the very best way to disinfect surfaces people come in contact with and prevent the spread of MRSA.

**That's where Electrostatic Spraying Systems' XT-3 Sprayer comes in.**



Take a look at these two ceramic test targets. Each spray was the same except for one thing – the left target was sprayed with the electrostatic charging system ON, but the right target was sprayed with the charging system OFF. The results are *astounding*.

Our ESS XT-3 electrostatic sprayer has the ability to coat surfaces with a fine mist of a disinfecting chemical – it doesn't bead up and run off, it dries quickly, but most of all, it goes where other sprays don't go. It wraps around and covers the underneath and the back side of exposed surfaces. That's right! **Regular sprayers just can't do that.**

## Technical Specifications

| | | | |
|---|---|---|---|
| Nozzles | 1 | Dimensions | 42" H × 18" W × 24" L (1.07 m. × 0.46 m. × 0.61 m.) |
| External air supply required | No | | |
| Electricity required | 110v | Air Line Pressure | 30 PSI (2.11 kg./cm2) |
| Electrical option | 220v | Tank Pressure | 12 – 15 PSI ( 0.84 – 1.05 kg./cm2) |
| Standard hose length | 50 ft. (15.24 m.) | | |
| Maximum hose length | 100 ft. (30.48 m.) | Flow rate | 2 gal./hr. (7.57 ltr./hr.) |
| Weight empty | 105 lbs. (47.6 kg.) | Drop size | 40 microns |
| Weight full | 130 lbs. (59 kg.) | Spray range | 8 to 12 ft. (2.4 to 3.7 m.) |
| Shipping weight | 112 lbs. (50.8 kg.) | Available options | Two 50-ft. (15.24 m.) hoses<br>Additional Nalgene bottle |
| Main tank capacity | 3 gal. (11.4 ltr.) | | |

**Above:** The deadly methicillin-resistant *Staphylococcus aureus* bacteria. **Below:** The natural enemy of MRSA – The XT-3 Electrostatic Sprayer. This self-contained sprayer is perfect for disinfection, santization, and odor control applications. The XT-3 is equipped with one MaxCharge™ Electrostatic Spray gun. The main tank holds enough mix for 1.5 hours of spraying. Also included: one-liter Nalgene bottles for easy spot spraying. Compatible with all conventional chemicals and fungicides, the XT-3 is up to the challenge of X-TERMINATING MRSA.

**ELECTROSTATIC = BETTER SPRAY COVERAGE**

***It's That Simple!***
